### PROFESSIONAL SUMMARY

Entrepreneurial full stack developer with over 15 years of experience building web applications, automation systems, and digital products. Proven track record of founding and scaling technology ventures, including co-founding a startup incubator that supported 30+ early-stage companies. Expert in creating automated workflows that eliminate manual processes, building responsive web applications with modern JavaScript frameworks, and developing robust API integrations. Combines deep technical expertise with business acumen, having raised investment funding and managed cross-functional teams. Passionate about leveraging technology to solve real-world problems and create measurable impact.

## PROFESSIONAL EXPERIENCE

---

### Founder & Lead Developer — b0ase.com

Jan 2025 – Present

London, UK (Remote)

Full-service development studio specialising in automation systems, web applications, and digital product development for content creators, agencies, and startups.

- ▶ Designed and deployed automated social media posting systems using Python, Flask, and Twitter API, reducing client manual workload by 10+ hours per week
- ▶ Built custom web applications and dashboards using React and Next.js for content management and analytics
- ▶ Developed API integrations connecting Google Drive, social platforms, and scheduling tools into unified automated workflows
- ▶ Provided technical consulting and architecture review for early-stage startups
- ▶ Created comprehensive brand identity packages including positioning, LinkedIn optimisation, and service definition

### Founder & Technical Director — Ninja Punk Girls (NPG)

Apr 2022 – Present

London, UK

Digital brand portfolio and content creator management platform operating multiple brands with international content creators.

- ▶ Built and maintain technical infrastructure supporting multiple content creators across UK and Thailand
- ▶ Developed automated content scheduling and distribution systems handling 100+ posts per week
- ▶ Implemented revenue-sharing models and automated payment tracking systems
- ▶ Created custom admin dashboards for creator performance analytics and content management
- ▶ Managed cross-functional relationships with content creators, designers, and marketing partners

### Co-Founder & Technical Lead — Satoshi Block Dojo

Mar 2021 – May 2022

London, UK

Blockchain-focused startup incubator and accelerator programme providing funding, mentorship, and technical resources to early-stage founders.

- ▶ Co-founded incubator programme that supported 30+ startups through ideation to MVP stage
- ▶ Led technical due diligence and architecture reviews for portfolio companies
- ▶ Mentored founders on product development, technical strategy, and go-to-market execution
- ▶ Facilitated connections between startups and enterprise partners for pilot programmes

- ▶ Developed curriculum and workshop content for technical bootcamps
- ▶ Secured investment partnerships and managed stakeholder relationships

### **Director — The Bitcoin Corporation Ltd**

2019 – Present

*London, UK*

Technology consultancy focused on blockchain applications, decentralised systems, and Web3 development.

- ▶ Developed Bitcoin Writer, a blockchain-based document management system with tokenisation capabilities
- ▶ Consulted for enterprises exploring blockchain integration for supply chain and digital asset management
- ▶ Published technical research on scalable blockchain architectures and micropayment systems
- ▶ Built proof-of-concept applications demonstrating practical blockchain use cases

### **Senior Web Developer & Technical Consultant — Freelance**

2010 – 2021

*London, UK*

Independent consultant delivering web development, technical strategy, and digital transformation projects for agencies and direct clients.

- ▶ Delivered 40+ web development projects ranging from marketing sites to complex web applications
- ▶ Developed custom CMS solutions and e-commerce platforms for retail and B2B clients
- ▶ Led technical migrations from legacy systems to modern cloud-based architectures
- ▶ Provided ongoing maintenance and support contracts for long-term client relationships
- ▶ Collaborated with design agencies as technical partner for development execution

## SELECTED PROJECTS

---

### Automated Social Media Publishing System

End-to-end automation pipeline that monitors Google Drive folders, processes new content, and publishes to multiple Twitter/X accounts on configurable schedules. Includes Flask API backend, queue management, and error handling with notifications.

*Python, Flask, Tweepy, Google Drive API, Oracle Cloud*

### Content Creator Management Dashboard

React-based admin dashboard for managing multiple content creators, tracking performance metrics, scheduling content, and handling revenue-sharing calculations with automated reporting.

*React, Next.js, TypeScript, Tailwind CSS, Firebase*

### Bitcoin Writer

Blockchain-based word processor enabling document tokenisation, immutable version history, and micropayment integration for content monetisation.

*React, Node.js, BSV Blockchain, MongoDB*

### Comic Book Sequencer

Interactive web application for managing and viewing comic book collections with sophisticated filtering, search, and modal gallery viewing across multiple fictional series.

*React, TypeScript, Image Processing, Responsive Design*

### Financial Data Processing Pipeline

Automated system for parsing bank statements (HSBC), extracting transaction data, converting to standardised CSV formats, and generating financial analysis reports.

*Python, Pandas, Data Processing, CSV/Excel Export*

## EDUCATION

---

### MA Journalism and Digital Media

Kingston University, London  
Postgraduate

### BA (Hons) Computing and Digital Media

University of Brighton  
Undergraduate

### Secondary Education

University College School, London

## PROFESSIONAL DEVELOPMENT

---

**Blockchain & Cryptocurrency** — Self-directed study and practical application since 2012

**Modern JavaScript Frameworks** — React, Next.js, TypeScript ecosystem

**Cloud Architecture** — AWS, Oracle Cloud, Vercel deployment

**Automation & Integration** — n8n, API development, workflow design
